Rajasthan’s Revenue Courts to go Fully Digital on November 1, 2017

V. Srinivas, Chairman Board of Revenue for Rajasthan said that Rajasthan’s Revenue Courts are ready to go fully digital from November 1, 2017. The Board of Revenue conducted the first round of trainings on the Revenue Courts Management Systems for Master Trainers in all 33 districts of Rajasthan, followed by a training of all subordinate staff of Revenue Appellate Authorities. The second round trainings were conducted by Master Trainers to the subordinate service officials of the courts of District Collector, Additional District Collector and Sub-Divisional Officer. The District Collector, Additional District Collector and Sub-Divisional Officer Courts officials have been trained on 5 modules of Revenue Courts Management Systems namely case registration, cause list preparation, online judgment, notice generation, talbi and feedback modules.

On November 1, 2017, all Revenue Courts would be going online: 23 Courts of Revenue Appellate Authorities; 33 Courts of District Collectors; 37 Courts of Additional District Collectors; and 350 Courts of Sub-Divisional Officers. V. Srinivas said that as of October 12, 2017, 12 of the 23 Courts of Revenue Appellate Authorities, 19 of 33 Courts of District Collectors, 25 of 37 Courts of Additional District Collectors and 87 of 350 Courts of Sub-Divisional Officers have informed their readiness to go online on November 1, 2017. The Board of Revenue is hand-holding the remaining Revenue Courts to complete their preparations for the November 1, 2017 launch.

The trainings for subordinate service staff of 350 Tehsildar Courts would be taken up after the Courts of District Collector, Additional District Collector and Sub-Divisional Officer are fully operationalized. V. Srinivas further said that the Board of Revenue had taken the historic step of placing its judgments online on October 1, 2017. Till date, the Board of Revenue has placed nearly 200 judgments online, and by end October would be placing nearly 800 judgments online.

The creation of the Rajasthan Revenue Courts Grid with all judgments from the Courts in the Board of Revenue all the way to Tehsildar Courts would be a significant step for easing the litigant’s journey in Revenue Courts. V. Srinivas said that “the litigant remains the centrality of the entire Digital Rajasva Mandal being implemented in mission mode. The First Digital Revolution in Revenue Courts Administration being undertaken under the aegis of Board of Revenue for Rajasthan would provide the Nation with a viable and sustainable roadmap for transparency in Revenue Court Work.”
