Geospatial Technology Integration

GIS and remote sensing create digital land maps, optimise land resource management, reduce disputes and enable real-time land-use monitoring.

Digital India Land Records Modernisation Programme (DILRMP)

Complete digitisation of land records, accessible online, ensuring error-free registrations, transparency and streamlined services for rural and urban areas.

Apna Khata & Dharaa Mobile App

Enables farmers and citizens to verify land ownership, check transaction history and receive real-time alerts on property records.

Girdawari App for Farmers

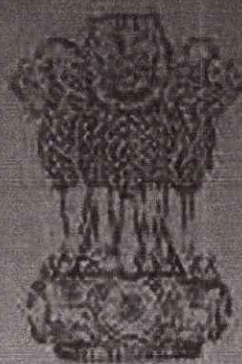

Facilitates self-girdawari, improving transparency, accessibility and digital record-keeping for land use and crop assessment.

Revenue Officers App & Paperless Governance

Digital transformation of revenue offices ensures efficient, paperless workflows, improving record-keeping and accessibility for officials and citizens.

Modernised Land Dispute Resolution

Lok Adalats & digital court management systems (RRCMS) enable faster land dispute resolution through data-driven assessments and e-court initiatives.
