REVENUE (GROUP-6) DEPARTMENT**

F. 6(18) Revenue B/56

dated: 1-11-1955

***Rajasthan Tenancy (Government) Rules, 1955***

**Notification**

In exercise of the powers conferred by Section 257 of the Rajasthan Tenancy Act, 1955 (Rajasthan Act 3 of 1955) the State Government has made the following Rules, the same having been previously published as required by Section 259 of the said Act.

**CHAPTER I**

***Preliminary***

**1. Short title and commencement.** - (1) These rules may be called the Rajasthan Tenancy (Government) Rules, 1955.

(2) They shall come into force at once.

**2. Interpretation.** - In these Rules unless there is something repugnant in the subject or context, the Act means the Rajasthan Tenancy Act, 1955 (Rajasthan Act No. 3 of 1955).

(2) The provisions of the Rajasthan General Clauses Act, 1955 (Rajasthan Act VIII of 1955), shall *mutatis mutandis* apply to the interpretation of these Rules as they apply to the interpretation of an Act of the Rajasthan Legislature.

**CHAPTER II**

***Rules To Give Effect To The Provision Of Clause (28) Of Section 5***

**13.** Omitted

**4.** (1) In villages where settlement operations are in progress, the Settlement Officer shall take action for the demarcation of pasture land after making a summary enquiry from the villagers with regard to the area in which the cattle of the village are usually grazed and after consultation with the Village Panchayat.

---

<sup>1</sup> Omitted by Notification no. F 5(7) Rev./Gr.4/76/13, dated 02-05-81

(2) In cases where the village Birs are used exclusively for the grazing of village cattle free of charge and no grass is cut out of it, it shall be recorded as "Ghair Mumkin Charagah" and excluded from assessment.

### ***Rules To Give Effect To The Provisions Of Sections 98, 99, 100 & 104***

**25A. Maximum rent where the land revenue is settled.** - Subject to the provisions of Rule 24C wherever land revenue has been assessed in cash by settlement upon estate holders and rent payable in cash by the tenants of such estate-holder and such rent has not already been assessed in cash by the settlement Department or fixed by a decree or order of a competent court, the rent to be charged by such estate-holders from such tenants shall not exceed two times the amount of such land revenue;

**25B. Maximum rent in areas where rent has been settled.** - Subject to the provisions of Rule 25C, wherever rent payable by tenants has been determined in cash by settlement and rents are payable in cash by sub-tenants but the cash rent payable by such sub-tenant to the tenants in chief have not been determined by the Settlement Department or fixed by or under a decree or order of a competent court, the rents to be charged by the tenants-in-chief from their sub-tenants shall not exceed two times the amount of rent so assessed or fixed.

<sup>35</sup> Added by Notification no. F.7(94)Rev.b, dated 06-05-58.

**25C. Higher maximum in certain cases.** - Where the estate-holder or the tenant who sub-lets is a widow or a minor or a disabled person or a student who is below 25 years of age and is studying in a recognised institution the rent to be charged from the tenant by such estate-holder or from the sub-tenants by such tenant-in-chief may extend in the case of the estate-holder to 3 times the assessed land revenue, add in the case of a tenant who sublets to 3 times the assessed rent.

**25D. Maximum rate of rent in kind.** - Where rents are payable in kind the maximum rent in kind payable by a sub-tenant to a minor or a lunatic, or an idiot, or a woman who is unmarried or divorced separated from her husband or is a widow, or a person incapable of cultivating his holding by reason of blindness or other physical disability or infirmity, or a person not exceeding 25 years of age who is a student prosecuting his studies in a recognised institution may extend to  $\frac{1}{4}$ th of the gross produce.

## CHAPTER VI

### *Rules To Give Effect To The Provisions Of Section 126 Of The Act*

**26.** Agricultural calamities are of two kinds (1) wide-spread and (2) local. Famine and drought are considered wide-spread, while frost, rust, hail, locusts and flood are generally local affecting a limited area. On the occurrence of an agricultural calamity, relief is given either by suspension or by remission of rent.

**27. Principles for deciding whether suspension or remission should be recommended.** - Suspension will ordinarily be sufficient in the case of a calamity affecting the 'Kharif' but when the calamity is exceptionally severe or when the economic condition of the people has been reduced by previous crop failures, or when the Kharif is the main or exceptionally important crop, remission of rent be recommended.

When calamities affect the Rabi, remissions should ordinarily be proposed. The reason, why suspension and not remission is ordinarily granted on the occurrence of an agricultural calamity affecting the Kharif, is that Kharif (save cotton) is generally composed of the food crops of the people, while the Rabi consists of the cash or rent paying crops. It is, therefore, necessary to consider the relative importance of the Kharif and Rabi harvests, in determining the extent of relief by way of suspension or remission of rent :

<sup>36</sup> Provided that where there has been continuous famine for three years in succession in any village and the damage caused was more than 8 annas in all the crops, the Collector shall give automatic remission of rent for the first year.

---

<sup>36</sup> Added vide Notification dated 17,01.70.

**28. Promptitude essential.** – Relief shall be related to the loss suffered by individuals, but promptitude in the issue of orders is of far greater importance than meticulous accuracy in the estimation of loss. Particularly when the area which has suffered loss is large, small difference in the loss suffered by different crops shall be ignored and an average rate of loss assumed.

<sup>37</sup>**29. Scale of relief.** - The relation between the relief to be given in rent and the loss on the holding calculated, is given in the following table :

Loss measured in paise per rupee of normal produce		Relief in rent
1.	Less than 37 paise	Nil
2.	Amounting to 37 paise but not amounting to 50 paise	25 paise
3.	Amounting to 50 paise but not amounting to 62 paise	37 paise
4.	Amounting to 62 paise but not amounting to 75 paise	50 paise
5.	Amounting to 75 paise	62 paise
6.	More than 75 paise	100 paise

In the case of holdings the rent of which is payable by division of the produce or is based on appraisalment of the standing crops, relief generally is not given.]

**30. Principles for deciding whether suspended amount should or should not be collected.** - The following principles should guide the Collector in deciding whether a suspended amount or rent falling due for collection should be collected or not :-

- (a) Suspended rent should be recovered as soon as the circumstances of the people and the out turn of the harvest permit.
- (b) As soon as the prospects of the harvest at which the collection of suspensions has been provisionally proposed, are sufficiently clear, the Collector should determine the amount of arrears which he can collect with the harvest and should report his proposals to the Commissioner.
- (c) In making this report, the Collector should be guided by the nature and the extent of the calamity on account of which relief was given, the character of the harvest about to be reaped, and the condition of the people.
- (d) When the crops of the harvest to which the suspended rent have been carried forward are themselves below normal, remission of the suspended amount may be recommended in whole or in part.

## *Inspection And Estimates Of Damage*

**31. Necessity of constant watch over crop condition.** - It is the business of revenue officers and in particular of Collectors and Sub-Divisional Officers closely to watch the state of the crops in the areas committed to their charge. It is only by paying continuous attention to the weather and other conditions which affect the crops from the time of sowing to the time of harvest, that it is possible to take action to give relief with the necessary promptness. Inspections of crops must, therefore, not be confined to harvest time or delayed until it is rumoured that the crops have failed. During their rainy season and cold weather tours, revenue officers must make constant inquiries as to the crop prospects and must make a point of visiting those areas in which there is a possibility of crop failure.

It is the duty of all subordinate revenue officials to report cases of crop failure promptly to their superiors and it is the duty of the Collector and Sub-Divisional Officers and Tehsildars in cases in which they cannot make sufficiently detailed inquiries themselves to call for detailed reports from their subordinates. Government and Commissioners must be kept in touch with the agricultural situation through Collector's fortnightly demi-official letters. Commissioners themselves should, if there is expectation of an extensive calamity, arrange to visit the area affected.

**32. Special Inquiries.** - When it appears that relief to the cultivators will probably be necessary, the Collector should arrange for a special inspection of the area affected and should unless the area damaged is very small, himself inspect the area. If the area is large it will generally be impossible for the Collector to make a detailed inspection himself. In such a case it will generally be expedient to have detailed village inspections done by Inspectors of Land Records and Naib Tehsildars and to have their work checked by Tehsildars and Sub-Divisional Officers. Reports should at this stage not be called for from patwaris. The Collector should himself carry out a sufficient check of the work of his subordinates to enable him with the knowledge he has obtained from watching the crops since they were sown to satisfy himself of the accuracy of the reports which he has received or to correct these reports. The Collectors should be able when issuing instructions for detailed inspection of an affected area, to indicate the general lines on which he wishes that inquiry to proceed and the point on which he wishes for detailed information. It is useful especially in the case of extensive damage, for the Collector to hold a conference of the Sub-Divisional Officers and Tehsildars concerned at which final conclusions can be reached as to the extent and nature of the damage. The preparation of maps showing the villages affected and the comparison of the maps of one tehsil with the maps of neighbouring tehsils is a valuable check to ensure that no area, where relief is necessary, has been left out and that relief will be given on the same principles throughout the district.

**33. Classification of fields and estimate of loss.** - (1) It is impossible to base the relief given to cultivators on estimates of the damage caused to individual fields and no attempts should be made to do so. Estimates of damage must be made for classes of fields as a whole and not for individual fields. The classification of fields for this purpose must depend on the nature of calamity. It may be that the loss is uniform over

the unirrigated fields and that the loss, if any, in the irrigated fields is also uniform, in which case it will be necessary only to make for each village an estimate of the loss on the irrigated fields as a whole and on the unirrigated fields as a whole. In other cases the loss may vary according to the crop. If so, it will be necessary to mark for each village an estimate of the loss on each crop. It may also be necessary to distinguish not only between crops, but also between irrigated and unirrigated fields of the same crop. In other cases, such as hail or flood, a part only of a village may be damaged or different parts may be damaged to different extents. In such a case it will be necessary to mark off the damaged portion, or the portion damaged to varying extents, on the village map and to estimate the damage done in such portion or in each of such portions. It may be necessary in this case also to distinguish between the different crops in each of such portions. Definite orders must be passed by the Collector in the case of each village affected by the calamity as to the damage suffered by each class into which he has ordered that the fields be divided. For this purpose if the area damaged is extensive, it will generally be advisable to group villages. It is essential that the system on which fields are to be classified for the purpose of determining the loss be laid down before any attempt is made to work out detailed calculations. Once the classes have been decided on by any authority, no lower authority has any power to vary the estimate of loss as between fields of the same class.

(2) In deciding on the classification to be adopted the Collector must remember that the estimates of loss can only be approximate and that too meticulous a classification defeats its own purpose as it delays the preparation of relief statements and causes harassment to the cultivators.

(3) In framing his estimates of loss, the Collector should remember that the normal crop that is to say the crop which has suffered the normal amount of damage in a season which is not exceptionally good, is generally reported as being a 12 or 13 annas crop. It is only in years in which the crop has escaped any damage that the crop is reported as 16 annas. Such years are exceptional and not normal. The instructions however, assume that the normal crop, is a 16 annas crop, i.e. in the instructions loss means loss in excess of the normal loss. Unless care is taken this may lead to an over-estimate of the loss particularly in the case in which the damage is not very great.

(4) Collectors cannot be too careful to guard against a general tendency that exists in the subordinate staff to over-estimate losses as a precaution against possible objections by cultivators. Government desire to impress upon Collectors the imperative need for a thorough and careful checking by the superior staff of estimates of losses with a view to prevent exaggerated estimates and consequent loss of Government revenue.

**34. The "normal area".** - If the nature of the calamity is such that it has reduced the sown area, as happens in the case of a shortage in the late monsoon rainfall, allowance must be made for this reduction in area in calculating the loss suffered by the cultivator. The general principle is that area which has not been sown, but which would have been sown but for the calamity is treated as if it had suffered a loss of 16 annas. It

is obviously extremely difficult to decide which of the fields that have not been sown in a particular year would have been sown if the circumstances had been different. The most direct method of approach would be to compare the sown area of each holding with the sown area of the holding in a normal year. This necessitates a detailed comparison of the khatauni of the year. In which the calamity occurs with the khatauni of a normal year which is a laborious process and takes time. Difficulties too arise in areas of shifting cultivation. A less laborious and quicker method is to determine by comparison with a normal year the percentage of the holdings area which is normally sown and to assume that this percentage of each holding would have been sown in the year of the calamity if the season had been normal.

(2) It is the business of the Collector to determine whether allowance should be made for shortage of sown area and, if such allowance is to be made, to determine which year should be taken as normal. If the nature of the calamity was such as not to affect the sown area, or if the effect was small, says less than 10 or 15 per cent, no allowance will be made.

**35. Preliminary report to the Commissioner.** - (1) As soon as the Collector has decided on the nature and extent of the calamity and the steps which he proposes to take to deal with it, he shall send a preliminary report to the Commissioner explaining the situation fully both as regards the area affected and the classification of fields which he proposes to adopt for the purpose of calculating the relief with an estimate of the damage suffered by each class, and in cases in which it is necessary to allow for shortage of area, giving an estimate of the shortage. He should discuss the condition of the cultivators. To enable the Collector to follow the progress of the season and to know how far the rainfall in any season departed from the normal as regards either distribution of amount, a statements of normal rainfall by rain-guage stations will be published separately and supplied to all Collectors. When relief is proposed on account of excessive rainfall or failure of rains, the Collector should refer to the statement in making his proposals and compare the figures of the normal and the actual rainfalls in his report.

(2) The Collector's report shall also give (a) the areas under the Kharif and Rabi crops grown in a normal year in each tehsil affected, with details of irrigated and dry areas; (b) the total rental demand of the villages affected; and (c) a rough estimate, as far as one can be made at this stage, of the relief which it will be necessary to give in the rental demand. It is unnecessary at this stage for the Collector to make any recommendation whether the proposed relief should be given by way of remission or suspension.

(3) The report should not be delayed by the inclusion in it of detailed calculation. It should be dispatched within a fortnight of the occurrence of the calamity, and in no circumstances (except in a case of damage by fire) should it reach the Commissioner later than December 15, in the case of a calamity affected the Kharif and May 15, if the Rabi is affected.

(4) Before finalising his report under this rule, the Collector shall issue a public notice of the extent of the loss or damage which he estimates to have been caused in the area affected by the agricultural calamity calling upon all persons concerned to lodge their objections, if any, before the Tehsildar within the local limits of whose jurisdiction their holdings are situated within three days of the publication of the notice by beat of drum in accordance with clause (b) of sub-rule (5).

(5) Such public notice shall be in Form CC and shall be published :-

(a) by pasting a copy thereof :-

(i) on the notice board of the office of the Collector issuing it,

(ii) on the notice board of each Tehsil within which the area affected by agricultural calamity or any part thereof is situated, and

(iii) at some place of public resort in each village the whole or a part of which is affected by the calamity; and

(b) by beat of drum in each such village.

(6) If any objections are received by the tehsildar, they shall be disposed of by him summarily on the very day of their receipt and shall be submitted to the Collector, along with a report showing the disposal thereof and the publication of the notice issued under sub-rule (4), as promptly as may be possible but not later than a week after the publication of the said notice by beat of drum.

(7) The report under sub-rule (1) should, in addition to the other particulars mentioned in that sub-rule and in sub-rule (2), also refer to the fact of the issue of the public notice under sub-rule (4) its publication in the manner provided by sub-rule (5), the objections, if any, lodged under sub-rule (6) and the manner of their disposal.

**36. Commissioner's orders on Collector's preliminary report.** - As soon as the Commissioner receives the Collector's report submitted under the previous paragraph, he should forward a copy of the Collector's report and of his recommendations thereon to Government for information. It is essential that the Commissioner should make explicit report approving or modifying the estimates of the loss of the classes of fields submitted by the Collector. It is the Commissioner's duty to see that adequate, but not excessive, relief is given. Commissioner should see that proposals are not detained for more than a week in their office before being submitted to Government.

### ***Preparation Of Relief Statements***

**37. Entry of loss in Khasra and Relief Khatauni.** - As soon as the Collector has decided on the nature and extent of the calamity and the measures necessary to deal with it, he shall, on receiving the orders of the Government issue orders for the preparation of the relief statements. The Patwaris of the villages affected by the calamity should be called to the tehsil and, except in very special cases, should remain at the tehsil until their statements are prepared. The first step in the preparation of these

statements is to enter in the remarks column of the khasra opposite each field the estimated damage in anna per rupee caused to the crop in that field in accordance with order passed under Rule 33. At the same the area of "equivalent total loss" will also be calculated and entered in the remarks column. This is a measure of the loss on the sown area expressed as an area. Thus if the sown area of two acres has suffered a loss of 10 annas in the rupee this is taken as the equivalent of  $\frac{3}{4}$  acre of undamaged crops and  $1\frac{1}{4}$  acres of total loss. This area of  $1\frac{1}{4}$  acres is the area of equivalent total loss. A sufficient number of these entries must be checked by the Inspector of Land Records to ensure that the Collector's orders are being carried out. The information contained in the khasra will generally enable this to be done, but in cases in which only certain portions of the village have been damaged by hail, flood, etc. a reference to the map will be necessary.

### 38. Calculation of relief in tenants holdings paying a fixed cash rent. - (1)

The next step is the preparation of the relief khatauni in the form given below. The object of the relief khatauni is to enable the calculations of relief in rent to be carried out. The first step in this calculation is to transfer to column 5 of the relief khatauni the area of equivalent total loss in each field and total this column for each holding to get the area of equivalent total loss in the holding.

Column 4 is also totaled to obtain the total sown area of the holding. If there has been no loss due to shortage of area, the loss suffered by the holding as a whole is expressed in annas per rupee by comparing this area of equivalent total loss with the area of holding which was cultivated in the season in which the calamity occurred. This is taken as the loss measured in annas per rupee of the normal produce. In the case of fixed cash rents the full rent demand of the season is entered in column 10 and the actual rent payable in the season is then worked out by applying the scale given in paragraph 3 and entered in column 11.

### *Relief Khatauni*

Serial No. in ordinary Khatauni	Name and percentage of cultivator	Khasra No. of field	Area sown	Area of equivalent total loss	Normal area of season	Shortage of area	Total of shortage of area and area of equivalent total loss	Loss in anna per rupee	Rent demand of the season	Rent payable in the season	Remarks
1	2	3	4	5	6	7	8	9	10	11	12

**39. Checking of entries by Superior Officers.** - It is of the utmost importance that entries of equivalent total loss in the khasra and the entries and calculations made in the khatauni should be subjected to a thorough and complete check as they form the basis of the actual amount of relief in money. While the Inspector of Land Records shall

be immediately responsible for the accuracy of the entries and calculations, the Collectors must also prescribe a suitable percentage of check by the Tehsildar and Naib-Tehsildar. The Sub-Divisional Officer should see that the check done by the Tehsildar and other subordinates is real and effective.

**40. Relief Khatauni may be dispensed within certain cases of uniform damage.** - If uniform damage is caused to all the crops of a village, it is, of course, unnecessary to prepare the relief khatauni as relief to be given, can be calculated directly from the table given in Rule 29, but except in unirrigated areas, such cases seldom arise the damage is due to floods :

<sup>38</sup>{Provided that no relief khatauni shall be prepared in cases where automatic remission is to be given under Rule 27}

**41. Relief to sub-tenants.** - If the sub-tenants area is large, the subtenants may also be given relief in the same proportion as is granted to the tenants-in-chief.

<sup>39</sup>{**41A.** Rent suspended due to failure of crop shall not be realised for more than two years at a time in a good year following the period of calamity including the Land Revenue for the good year.}

**49. Fee.** - With every application a fee of Rupee one shall be deposited by the applicant.

## CHAPTER X

### *Rules To Give Effect To The Provisions Of Section 160 Of The Act*

**50.** by Notification Dated 02.05.81

**51. Area to which application shall relate.** - An application to the Collector for realisation of arrears of rent as arrears of land revenue under Section 160 of the Act shall not relate to an area larger than a village. There shall be a specific application for each village or part of.

**52. List to accompany of application.** - Each application shall be accompanied by lists in duplicate showing in Form F appended a village to these rules the details specified in columns 1 to 6 of that form for every defaulter in the village against whom the application desires proceedings to be taken. If a defaulter is in arrears in respect of more than one holding, each such holding shall be shown separately.

**53. Receipt book to be produced with application.** - The applicant shall produce along with his application one or more receipt books printed under the provisions of Section 137 of the Act, and containing a sufficient number of receipt forms and counterfoils for the use of the officer realising the arrears.

**54. Verification of application.** - The application shall be verified as a pleading in accordance with Rule 15 of Order VI of the Code of Civil Procedure (V of 1908).

**55. Application how treated.** - The application, after presentation shall be at once formed into a file with an index and order sheet attached.

**56. Checking of list by Collector.** - The Collector shall check the lists by examining the record relating to the realisation of rents maintained by the land-holder or the Patwari, or by any other suitable method, and shall satisfy himself that the amount claimed is due and may make such modifications in the lists as appear to be necessary. The Collector shall also see that the claim on account of interest in column 5 has been

correctly calculated at the rate prescribed by the Act, (one anna per rupee per annum simple interest). After checking the entries in columns 3-6 and making such alterations in them as may be necessary, the Collector shall enter in column 7 the amount passed by him for realisation.

**57. Agency for collection.** - The Collector shall then send the lists, together with the receipt-books, to the Tehsildar who shall either proceed to realise the arrears himself or shall entrust the duty to another officer who shall be a Naib-Tehsildar or an Inspector of Land-Records. The arrears shall be recovered as arrears of land revenue.

**58. Extra staff.** - The Collector may appoint extra staff to make the collections.

**59. Limit to the cost of extra staff.** - The cost of the extra staff employed should not ordinarily exceed 4 per cent of the demand, and in no case should it exceed 5 per cent of the demand.

**60. Receipt to be issued.** - The officer charged with the realisation of the arrears shall give a receipt to each defaulter for the amount realised from him from the printed book or books supplied by the applicant under Rule 53.

**61. Arrears collected how disposed of.** - The Tehsildar or the Naib-Tehsildar who has made collections may, if the applicant or his authorised agent is present, hand over to him on his written receipt any sum realised by him under these rules. If the applicant or his authorised agent is not present, or does not agree to take the amount realised or if the collections are made by an officer other than the Tehsildar or Naib-Tehsildar, the amount collected, shall be deposited in the treasury as a revenue court deposit of the Tehsildar's court payable to the applicant and the requisite challan shall be attached to the file <sup>41</sup>{before the final payment to the applicant is made, the costs of collection fixed by the Collector in accordance with the provisions of sub-section (5) of Section 160 shall be deducted and one of the duplicate list in Form 'F' under Rule 52 will be given to the applicant with all the columns filled in.}

**62. Payment to be entered In cash books.** - Whenever any sum is paid either to the applicant or his authorised agent or deposited in Court, an entry to this effect with the name of the payee and the amount shall be entered in the cash book (Form G) and initialled by the Tehsildar.

<sup>42</sup>**63. Intimation of realisation.** - The accountant shall maintain a register in Form H in which all sums realised from time to time shall be entered. All such realisations shall be intimated to the Tehsildar.

<sup>43</sup>**64. Comparison of accounts.** - The officer making the collections shall, on his next visit to the tehsil or as soon afterwards, as possible, compare the entries in his cash book with those in the register kept by the Accountant.

### *Rules To Give Effect To The Provisions Of Section 180 Of The Act*

**65. Procedure For Ejectment Of Khudkasht And Ghair Khatedars Tenants Or Sub-Tenants [Under Section 180(2) Of The Act,].** - In proceedings under section 180(2) of the Act, where there are more tenants or sub-tenants than one, whose ejectment is applied for by the landholder or where the area held by the tenant or sub-tenant is in excess of the area from which ejectment can be sought under clause (D) of section 180, the court shall, in ordering ejectment, be guided by the following principles :-

- (a) If the requirements of the land-holder can be satisfied from the area held by tenants or sub-tenants holding more area than the minimum prescribed by the Government the tenants or subtenants holding area less than the prescribed minimum shall be exempted, and proceedings shall be taken against the rest.
- (b) Other things being equal, the tenant who has sub-let his holding in contravention of the provisions of the Act, in whole or in part as the case may be, shall be ejected.
- (c) If the requirements of the land-holder cannot be satisfied as provided in sub-clauses (a) and (b) above, then the land which forms the Jav of masonry well constructed by the land holder at his own expense, whether held by the tenant of Khudkasht or Ghair Khatedar Tenant, shall be proceeded against.
- (d) The incidence of ejectment which has been determined in accordance with the above principles shall be distributed evenly and fairly as far as possible; upon the tenants or sub-tenants concerned regard being had to the size and value of each holding and the different categories of land included therein.
- (e) The area from which a tenant or sub-tenant is to be ejected shall, so far as possible be selected in such manner as to leave the remaining land, if any, in a compact block.

**66. Prescription of minimum area for the purposes of clause (a) of Section 180 of the Act.** - The minimum areas for the purposes of clause (a) of Section 180 of the Act shall be such as are shown in the schedule annexed to these rules and where the areas consist of both irrigated and unirrigated land, three acres of unirrigated land shall, for calculating the minimum area, be deemed to be equivalent to one acre of irrigated land.
